Response to Arguments

- Applicant's arguments, see page 9, lines 15-21, filed 27 December 2004, with respect to claims 1-23 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method for gamut mapping an original image using at least one of plural different gamut mapping algorithms. The closest prior art, Nakauchi et al. (USPN 6,198,843 B1), shows a similar system, in which, luminosity and chromaticity are separately corrected so as to achieve matching of suitable frequency components on a visual sensitivity as at a higher level as possible, this makes it possible to achieve color gamut

mapping conceived taking the spatial frequency characteristics of images into consideration, which can be adjusted to suppress differences to a level almost imperceptible to human eyes. However, Nakauchi et al. fail to address:

Regarding claim 1, "for associating regions of the original image with one of the plural gamut mapping algorithms based on analysis of spatial frequency content and gamut mapping each region associated with a gamut mapping algorithm using the associated gamut mapping algorithm so as to produce a gamut mapped image of the original image"; Regarding claims 24 and 26, "for performing gamut mapping on the original image by using plural different gamut mapping processes while obtaining spatial frequency content of the original image and controlling the gamut mapping based on the spatial frequency content". These distinct features have been added separately to different independent claims and render them allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
